

The GREENSHIELD™ Advantage

Delivering Homeowner Satisfaction

GREENSHIELD is a performance insulation system made from recycled paper fibers. GREENSHIELD is a sustainable building product and should be specified in your Green certification product.

GREENSHIELD provides installed thermal performance and delivers reduced energy demand, lowering the cost to heat and cool. GREENSHIELD cellulose delivers homeowner comfort.

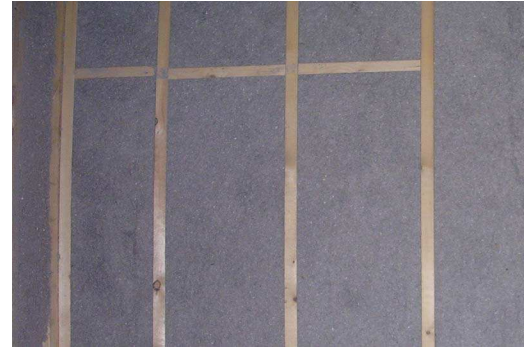

Using GREENSHIELD

ATTICS

Preferred choice for any builder
R-value performance across extreme temperatures
Cost to builder is same or less for better performance to homeowner

SIDEWALLS

Installed R-value
Energy performance upgrades
Sound & Comfort upgrade
Premium installation
Builders focused on performance and homeowner satisfaction

GREENSHIELD Advantages

Installed thermal performance

Reduced energy demand

Lower cost to heat and cool

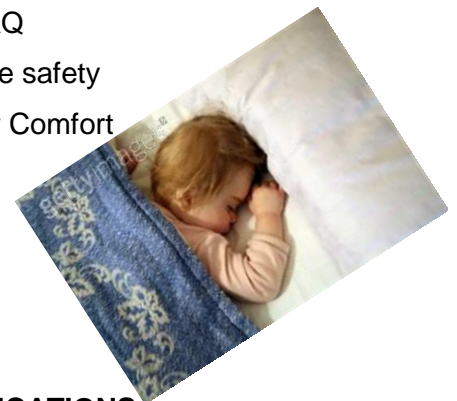

Less drafts and energy loss

Less nuisance noise

Improved IAQ

Improved fire safety

Homeowner Comfort

SPECIFICATIONS

- R-value @ 3.7 per inch
- Manufactured from recycled paper fiber
- Environmentally friendly and safe chemical treatment for fire resistance
- Conforms to CSPC Standard 16 CFR parts 1209 and 1404
- Meets ASTM C 739
- Class I Building material
